

Our secrets

General Description

Developing of interactive base with secrets. In this application customers can communicate incognito with each other, share their secrets like in Twitter. Also customer can read foreign secrets or revelations, or write something and mustn't be concerned about he could be recognized.

Solution

Proceed from the specification of customer business, full circuit of graphic interface was finished, usable navigation, appearance and functional shell were composed. We used standard elements in developing of application and some elements were developed by our designers, also we developed database for writing and saving secrets on iPhone and there was interaction with web services.

Basic Functions and Effects

- Capability of writing secrets.
- Function "Share secret".
- Adding category to the secret.
- Capability of looking through foreign secrets.
- Capability of auto loading secrets in certain time.
