

Rugby Fan. iPhone application

Customer

Corporation-developer of software.

Aim

The aim is developing the application, which shows the information from external server on iPhone. Also application must contain local information and allow viewing forum on Twitter and adding messages from customer (he must enter his login and password on Twitter).

Solution

First of all there were used standard elements of creating graphic interface in developing of application. If it was not enough, we create our own elements with necessary capabilities. There was realized front-end to the server for interoperability with service Twitter.

Basic Functions and Effects

- Viewing the information about English championship 09/10.
- Viewing games schedule and results.
- Viewing news.
- Viewing team's history.
- Viewing team's stuff.
- Viewing forum.
- Adding messages.
