

Trakart. iPhone application

Customer

Corporation-developer of software.

Aim

The aim is developing of application, which will cooperate with standard iPod player in iPhone. The main task of application is searching for photos or images similar to played song context and makes their slide show. Application must have control over standard iPod playback and its mode and crossing to slide show mode without toolbar.

Solution

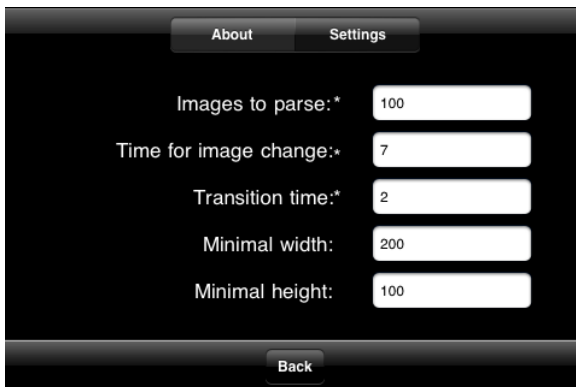

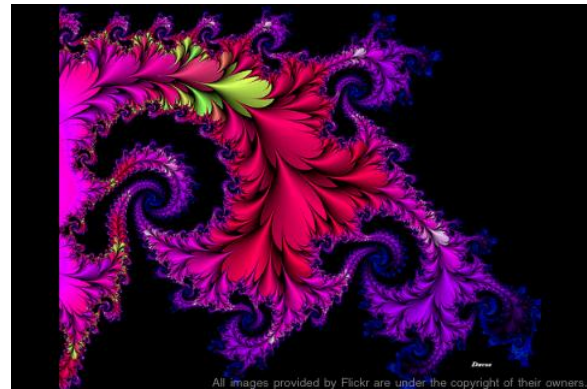

First of all there were used standard elements of creating graphic interface in developing of application. For realization of substandard toolbar there was developed proper component.

Basic Functions and Effects

- Standard iPod playback and its mode management.
- Crossing to mode without toolbar.
- Return to mode with toolbar.
- Viewing the information about application.
- Cleanup cache.
- Changing of application's configurations:
 1. Images to parse.
 2. Time for image change.
 3. Transition time.
 4. Minimal width.
 5. Minimal height.
 6. Advanced settings (connection timeout, lyrics' words per request, loop queue size).
