

WebViewEventsv05. iPhone application

Customer

Corporation-developer of software.

Business sphere: Education.

General description

Integration of popular app for reading text files Eucalyptus into big application with WebView interface.

Solution

Proceed from the specification of customer business and existing application for reading text files Eucalyptus, full circuit of graphic interface was finished, usable navigation, appearance and functional shell were composed. We created animation of turning the web-pages, falling star, saving of functionality of WebView interface before turning the web-pages.

Basic Functions and Effects

- Work with RSS-news
- Turning current web-page to the next by animation of book page.
- Animation of falling star with trail of little stars while giving appreciation of news.
- Saving of functionality of WebView interface before turning the web-pages.
